OUR FOOD PRODUCTION ETHOS

Our aim is to grow as much of our own produce on our small farm (under a mile from the pub) and harvest fresh for the kitchen, so maximum nutrients and flavour are retained. We are committed to growing using old-fashioned ways, and with no chemicals, either on the plants or in the soil. This means we have to share a small proportion of our spoils with local wildlife, but that's fine with us and as nature intended!

We have a large poly tunnel and are able to use the fresh water from our old well for our growing since the end of June 2026. Summer 2026, we will produce salad leaves, radishes, baby beetroots, mizuna leaf, chicory, kale, spinach, lettuces, rocket, watercress, parsley, sage, coriander, rosemary, broad beans, french beans, peas, pea shoots, tomatoes, sweetcorn, cucumbers, courgettes.....
